

We are offering following services:

- WWW Hosting
- E-mail accounts
  
- Webdesign
- Web applications deployment (e-commerce, etc.)
- Multimedia creations
- Visualizations
- Panoramic photography

**WWW Hosting:** We could offer you few, predefined sets of services with different prices. Instead of that, we offer "elastic" hosting. For a low price you get what you really need, not zillion of acronyms like SSI, CGI, SSH, WTF, that you don't know, don't need and will never use. For basic webpage hosting needs we offer:

- access to your site files via FTP
- PHP for creating dynamic pages
- MySQL for data storing and serving
- Detailed web page stats

**E-mail:** You can easily add and remove e-mail accounts within your domain. Our e-mail offer includes:

- access to e-mail via POP3 and IMAP4 protocols
- outgoing e-mail authorization
- access to submission service (port 587)
- easy reading via WWW (Webmail)
- antispam service (configured individually)
- global antivirus service
- aliases and forwards
- autoresponder

**Webdesign and web applications deployment:** we will install applications of your choice. If you don't know what particular app you need, tell us, and we will choose from a lot of open

source web apps. We prefer Joomla! for CMS and Virtuemart for e-commerce.

- if you don't know how your web page should look like, we will design it for you
- if you already have a graphical project of your web page, we will transform it into a functional website or template
  - we will find and install required Open Source software according to your needs
  - we will modify or code new functions and extensions
- we will create all needed graphics and photos, or we will find and buy them at stock services if needed

### **Multimedia:** we do:

- static 2D and 3D graphics, logos etc.
- animations
- presentations (including interactive)
- visualizations
- advertisements
- music background, soundscapes etc.

With any further questions contact us via [the contact form](#) , where "Imię i nazwisko" stands for your name, "email" - obvious, "Temat" - subject and "Wiadomość" - your message. To get a copy of your message please check "Przesłać Ci kopię" option.
